OBJECTIVE

With 1.6 years of experience as a Full Stack Software Developer, I bring expertise in React.js, Next.js, Node.js, Express.js, AWS, MySQL, Redux MongoDB, JavaScript, HTML, CSS, Bootstrap, MUI. I am on the lookout for an exciting and challenging role with a renowned IT organization, where I can not only contribute to the company's growth but also continue my journey of exploration and learning. My proficiency extends to Git, GitHub and Docker. Let's embark on this exciting tech adventure together.

PROFESSIONAL EXPERIENCE

ELECTRIFY SERVICES

Full Stack Software Developer

- Develop and maintain scalable web applications using modern technologies like React, Node.js, and AWS.
- Optimize application performance and ensure seamless integration of frontend and backend systems.
- Implement secure RESTful APIs and manage databases (MySQL/MongoDB) for efficient data handling.
- Participate in code reviews, testing, and debugging to maintain high code quality and reliability.

MICRO TECHNOLOGIES

Full Stack Software Developer

As a Full Stack Software Developer at Micro Technologies, I am responsible for developing and maintaining web applications using JavaScript, Node.js, React, Git, MySQL and AWS Services.

- Collaborate with cross-functional teams to gather requirements and analyze user needs.
- Design and implement responsive and user-friendly web interfaces using HTML, CSS and JavaScript. Developer server-side logic and APIs using Node.js and Express.
- Utilize databases such as MySQL and MongoDB for data storage and retrieval. Conduct thorough testing and debugging to ensure high-quality and error-free code.

Backend

Node.js, Express.js, APIs, Role Management, NodeMailer, JWT, Multer, Joi Validation

Third-Party API Integration

Razor pays

Cloud

AWS Cloud Services - EC2, S3, RDS, IAM, Amplify, VPC, Load balancing.

Containerized

Docker

Database

MySQL, Postgres, MongoDB

Authorization and Security

JWT, OAuth,

Source Code Management

GIT, GitHub

APT's Documentation and Testing

Swagger-docs, Postman

PROJECTS

(1) ED-Tech

Description: -

It has created a software called Ed-Tech Management System for the Online Platform in which the details of the Ed-Tech will be managed, the details of the Employees will be managed and the student will be able to book his Course and also make payment.

Role - Frontend tasks such as UI design, validation, and API integration, as well as backend responsibilities like API creation, validation, authentication, and role management.

Technologies - React.js, Bootstrap, JavaScript, Next.js, Node.js, My SQL, AWS Cloud Services.

(2) TP-Bazaar

Description: -

TP Bazaar is an E-commerce platform. In this E-commerce Project having 3 Module - Admin, Retailer, Customer. This project is designed and developed for local shop owners and customers in Bhopal. Customers can purchase a wide range of available products, while shop owners can register as sellers and add products for sale. An admin has the authority to add, activate, deactivate, and assign roles to users. They can also manage the product stock by adding or removing items based on their category and sub-category. The website is built using React.js, and role-based routing is implemented for users.

Role - Frontend tasks such as UI design, validation, and API integration, as well as backend responsibilities like API creation, validation, authentication, and role management.

Technologies - React.js, Bootstrap, JavaScript, Next.js, Node.js, My SQL, AWS Cloud Services.

(3) EMS

Description: -

An effective employee management system is used to manage the work process and organizational responsibilities of human resources and other departments. It helps managers and employees to work together and accurately monitor, access, manage, and efficiently utilize the working hours for better business growth.

Technologies - Figma, CSS, Html, Bootstrap, JavaScript, React.js, Node.js, Git, GitHub.

Role - Frontend tasks such as UI design and API integration, as well as backend responsibilities like API creation, validation, authentication, and role management.

(4) Livoncontrols

Description:-

LivonControls is a smart access control system that offers secure, centralized management for residential and commercial spaces. The system includes both a user-facing application and a comprehensive Admin Portal to manage smart keypads, user access roles, and device configurations remotely. Admins can install devices, monitor device status (online/offline), and control access in real-time.

Technologies - CSS, Html, Next.js, JavaScript, React.js, Nest.js, Git, GitHub.

Role - Developed and maintained frontend components for the Admin Dashboard using React.js and Bootstrap.
